10. *Condition of Body*—Whether well-nourished, thin or emaciated, Warm or cold.

- well nourished
- cold

11. *Regard Mortis*—Well-marked, slight or absent, whether present in the whole body or part only.

- marked

12. *Extent, and signs of decomposition*, presence post-mortem lividity of buttocks, loins, back and thighs or any other part. Whether bullae present and the nature of their contained fluid. Condition of the cuticle.

- no signs of decomposition

13. *Features*—Whether natural or swollen, state of eyes, position of tongue; nature of fluid (if any) oozing from mouth, nostrils or ears.

- natural
- partially closed
- tongue in mouth

- @ ear oozing of blood seen
- both ~~ears~~ ~~eyes~~ nostrils oozing of blood seen

14. *Condition of skin*—Marks of blood, etc. in suspected drowning the presence or absence of *cutes anserina* to be noted.

6. If not examined at Dispensary or Hospital—

(a) Name of place where examined.

(b) Distance from Dispensary or Hospital.

(c) Reason why the body was not sent to the Dispensary or Hospital.

II. External Examination—

7. Sex, apparent age, race or caste. Description of clothes and of ornaments on the body.

- male, approximately 28 yrs old, Hindu, blue, check shirt - & dark blue jeans, & green banyan, and dark blue under wear.

8. Condition of the clothes—

Whether wet with water stained with blood or soiled with vomit or fecal matter.

- wet with blood

9. Special marks on the skin such as scars, tattooing, etc., any malformations, peculiarities or other marks of identification. State of the teeth.

8/8
8/8

- molar (A) side teeth -

In newly-born infants, the length and (if possible), the weight of the body to be recorded together with the state of the hair, nails and umbilical cord, its length, whether placenta is attached or not, if present, its size and condition.

5
III. Internal Examination—

19. Head—

(i) Injuries under the scalp, their nature.

- cerebral contusion at (L) side of skull seen & also of skull bone fracture seen cerebral, temporal, occipital.

(ii) Skull—Vault and base describe fractures, their sites, dimensions, directions etc.

- Also depressed fracture on (L) side of skull bones include frontal, temporal occipital bones & others is seen.

(iii) Brain—The appearance of its coverings, size, weight and general condition of the organ itself and any abnormality found in its examination to be carefully noted (Weight M. 3 gram F. 2.75 grams).

- Brain matter is contused & meninges torn & not intact and also mixed with seen & congestion is seen

20. Thorax—

(a) Walls, ribs, cartilages

- intact, congested

(b) Pleura

- intact, congested

(c) Larynx, Trachea and Bronchi

- intact, congested.

(d) Right Lung

} both lungs are congested

(e) Left Lung

(f) Pericardium

- congested, intact

(g) Heart with weight ...

- intact-

(h) Large vessels

- embolized, congested
